

Cooling Towers Compliance and Safety

The Future of Legionella Control

Cooling tower maintenance is of paramount importance to ensure safety for all, regulatory compliance and operational efficiency. With a vast history in cooling tower treatment and maintenance, Total Environmental Compliance fully understands the impact that mismanagement can have on your cooling tower system.

Cooling towers pose a very high risk of Legionella due to the operating conditions and environment they are located in.

Damaging corrosion, scaling and deposits occur if cooling towers are not regularly cleaned and inspected.

- ✓ ACoP L8 and HSG274 Compliant
- ✓ Maintaining Operational Efficiency
- ✓ Environment Protection
- ✓ Expert Water Treatment Specialists
- ✓ Tailored water treatment plan for your cooling tower systems
- ✓ Advanced dosing, control systems and online monitoring services
- ✓ Same day reporting following site visit
