

ONLINE TRAINING COURSES

Approved Health & Safety
Training You Can Trust

YOUR TRUSTED GUIDES

Total Environmental Compliance (TEC) is a leading UK-based environmental consultancy specialising in water hygiene, water treatment, and compliance services. With 30 years of industry expertise, we provide nationwide specialist services for industrial, commercial, leisure, healthcare, public, social housing and education sectors.

Our in-house engineers and technicians deliver complete control of health and safety, work schedules and quality standards throughout every stage of each contract. As part of Premier Technical Services Group Ltd (PTSG), we're committed to safeguarding your water and protecting your people with customised solutions you can rely on.

To enhance our water safety solutions, we partner with clients to deliver tailored face-to-face legionella training sessions and also offer a full range of online health and safety courses.

WHY CHOOSE TEC TRAINING?

TEC delivers successful outcomes for clients, tenants, residents, and building users. We provide high-quality professional training that meets legislative requirements and addresses your organisation's specific needs while delivering exceptional value for money. Our online training programmes are designed by industry experts with decades of practical experience in our field of expertise and in health and safety.

Working with a wide range of clients spanning multiple sectors, we understand the unique challenges each sector faces and will tailor our training accordingly.

FLEXIBLE, ACCESSIBLE & COST-EFFECTIVE

Our interactive online training courses provide the opportunity for learners to revisit content as often as required, ensuring every employee gets the optimum learning experience.

At a fraction of the cost and management time, this range of online health and safety training is ideal for any organisation across all sectors.

THE TEC ADVANTAGE

-  **Expert Support:** Our in-house training team provides comprehensive guidance and troubleshooting throughout all modules, including resetting modules and offering expert advice to ensure your success
-  **Flexible Learning:** Complete courses at your own pace in just 60-90 minutes with the ability to pause and resume at your convenience, fitting training into even the busiest work schedules
-  **Full Compliance:** Meet all legal requirements and industry standards, avoiding fines and legal issues while ensuring your organisation meets regulatory obligations
-  **Reduced Accidents and Injuries:** Prevent workplace accidents and injuries, reducing downtime and associated costs through proper health and safety training
-  **Enhanced Reputation:** Demonstrate your commitment to health and safety to clients, partners, and the public, improving your organisation's standing
-  **Cost-Effective Solution:** At a fraction of the cost of traditional training methods, our online courses deliver exceptional value while minimising disruption to your operations

CLIENT SUCCESS STORIES

Our training programmes have helped organisations across various sectors achieve and maintain compliance while enhancing workplace safety:

“We have been working with Total Environmental Compliance since 2022 and have extended the contract year on year due to their professionalism, expertise, and commitment to their customers.

During this time, they have helped us achieve compliance across all our sites in our portfolio. We also use their simPRO field management software which is both comprehensive and easy to navigate. The team and our main point of contact, Laura, have proved to be very supportive, professional, knowledgeable as well as being very resourceful and accommodating.

They understand the challenges we face and work with us to evolve and improve our processes to meet our ever-changing needs. TEC have supported us in improving both our awareness and knowledge through constructive training and advice. As a business we would highly recommend them for Legionella Compliance & Consultancy services”

James Dickson, QUSE Manager, Stephen Sanderson Transport

OUR ACCREDITATIONS

TEC holds numerous proficiency accreditations and health and safety certifications, ensuring consistent, high-quality results:

Legionella Control Association

ISO 9001 Quality Management System

ISO 14001 Environmental Management System

CHAS Accredited Contractor

Constructionline Gold Member

Safe Contractor Approved

Safe Contractor Approved

These accreditations underscore our commitment to excellence and provide assurance that our training meets the highest industry standards.

OUR COURSE CATALOGUE

LEGIONELLA MANAGEMENT

Our interactive video-based training is aimed at all employers and staff to assist them in identifying the danger that Legionella poses. The Health and Safety at Work Act 1974 and HSE's code of practice L8 state that companies and building owners have a legal duty to manage Legionella. Learn to identify and assess sources of risk and implement effective control programmes.

FIRST AID

Emergency First Aid is the initial help given during an incident. While everyday first aid might involve something as simple as applying a plaster, this course prepares you for serious situations, highlighting common emergencies and appropriate actions. Learn to assess critical scenes, provide accurate information to emergency services, and take life-saving measures.

ASBESTOS AWARENESS

Asbestos is one of the most dangerous building materials ever used, causing thousands of illnesses and deaths annually. The Control of Asbestos Regulations 2012 require employers to provide training to anyone who might be exposed. This course is essential for maintenance workers and those who might disturb asbestos-containing materials.

ABRASIVE WHEELS

This comprehensive course covers the correct and safe use of various abrasive wheel tools and processes, from hand grinding to disc cutting. Different wheels have specific properties, risks, and hazards, making proper knowledge of handling and usage crucial for workplace safety.

COSHH

The Control of Substances Hazardous to Health (COSHH) course is designed for anyone exposed to hazardous substances at work and their managers. Learn about substances legally classified as toxic, harmful, corrosive, or irritant under the CLP Regulation, and how to manage these risks effectively.

DISPLAY SCREEN EQUIPMENT

These courses are for users of display screen equipment (DSE) and those responsible for assessment. Covering monitors, laptops, tablets, and other displays, this training meets statutory requirements and teaches safe DSE setup to reduce work-related health conditions.

FIRE SAFETY

The Regulatory Reform (Fire Safety) Order 2005 requires all workplaces to provide fire awareness training. Our online courses help employees identify and reduce fire risks, offering a cost-effective way for employers to meet legal obligations and ensure workplace safety.

FOOD SAFETY

Food handlers and employers must manage food safety according to EU and UK laws. Poor practises can lead to contamination with potentially fatal consequences. Our training increases awareness of food safety risks and teaches effective control and prevention methods, helping you maintain hygiene standards and achieve Food Hygiene Rating Level 5.

MANUAL HANDLING

Incorrect manual handling is one of the most common causes of workplace injury. This course covers proper techniques, risk assessment, and compliance with the Manual Handling Operations Regulations to prevent injuries and reduce workplace incidents.

WORKING AT HEIGHT

This course is aimed at anyone who undertakes or manages work at height. Learn about the Work at Height Regulations 2005, risk assessment, proper equipment use, and safety protocols to prevent falls and related injuries.

WORKING SAFELY

This essential course covers why workplace safety matters, defines hazards and risks, identifies common workplace dangers, and teaches methods for improving safety performance and protecting the environment.

SAFEGUARDING

These courses provide essential training on protecting vulnerable individuals. Learn about safeguarding laws and legislation, how to identify signs of abuse, neglect, and maltreatment, and the proper procedures for intervention and reporting.

WORKING IN CONFINED SPACES

This awareness course covers legislation associated with confined spaces, including identification, potential hazards, safe operating procedures, emergency protocols, and rescue operations.

CDM AWARENESS

The Construction Design and Management Regulations course covers health, safety, and welfare management for construction projects. Learn about core concepts, various professional roles, and key documentation required for regulatory compliance.

PRICING & PACKAGES

Our courses start at just £30 per licence. Depending on the number of licenses required, we can create bespoke training packages tailored to your organisation's specific needs.

For volume discounts and customised corporate packages please get in touch, or if you are looking for in person training, please contact us for a price.

GET STARTED TODAY

Protect your people and your business with expert-led online training from the UK's leading water safety and compliance specialists. Our online courses ensure your team has the knowledge needed to maintain a safe, healthy, and compliant workplace.
